Painting Inspector Level 2

Fact Sheet

Elite Offshore Pvt Ltd

Course Overveiw

This course is designed for experienced coating inspectors, QA/QC engineers, and supervisors seeking to advance their careers into senior-level painting inspection roles. The Painting Inspector Level 2 course builds on fundamental coating inspection knowledge and focuses on advanced inspection practices, specification interpretation, selection of appropriate test methods, film thickness measurement, sampling techniques, and statistical evaluation. It also covers coating failure analysis, non-conformance identification and reporting, quality control procedures, and inspection team leadership. Participants will gain advanced knowledge of specialised coating applications, including tank linings, pipeline coatings, and offshore structures. The course concludes with a final assessment to evaluate participants' understanding and competency in advanced coating inspection.
