# What does this course Covers?

## A. SAFETY INDUCTION

1. Identify the main offshore hazards and hazard effects/consequences; explain their associated risks, and how they are controlled.
2. Explain the potential environmental impact of offshore installation operations.
3. Identify key offshore installation safety regulations and explain the basic concept of these regulations.
4. Explain the principles of managing safety on offshore installations, PPE requirements of working on an offshore installation.

## B. SEA SURVIVAL AND FIRST AID

1. Donning of a permanent buoyancy lifejacket prior to use in an emergency.
2. The correct actions when mustering and boarding a survival craft (TEMPSC) as a passenger during launching operations.
3. Fitting of a helicopter strop and correct body posture during winching.
4. Individual and group sea survival techniques, to include: swimming, getting into Heat Escape Lessening Position (HELP), wave-slap protection, towing, chain, huddle and circle.
5. Boarding a Aprineliferaft from the water, ) Immediate first aid actions, to include: ABC .

## C. FIRE FIGHTING AND SELF RESCUE

1. Correct use of hand held portable fire extinguishers and which ones to use for different classes of fires.
2. Self-rescue techniques with a smoke hood from areas where visibility is reduced due to smoke.
3. Small group escape techniques with a smoke hood from areas where visibility is completely obscured.

## D. HELICOPTER SAFETY AND ESCAPE

1. Donning an aviation transit suit, aviation lifejacket and EBS and conducting EBS integrity checks.

- Course Code - 206

- Duration - 3 Days

- Knowledge level - Beginner

- Category - Offshore Oil & Gas

- Offline/Client Site

2. Actions to take in preparation for a helicopter ditching and an emergency landing.
3. Actions following a controlled emergency descent to a dry landing with evacuation via a nominated exit.
4. Deployment, operation and breathing from EBS in a pool utilising personal air prior to HUET exercises .
5. Actions following a controlled ditching on water (including deploying EBS and, on instruction from aircrew, operation of a push out window) and evacuate through a nominated exit to an aviation liferaft.
6. Assist others where possible in carrying out initial actions on boarding the aviation liferaft, to include mooring lines, deploying the sea anchor, raising the canopy and raft maintenance.
7. Escaping through a window opening which is underwater, from a partially submerged helicopter (without deploying EBS or operation of a push out window).

## Ready to get started?

Sign up for Basic Offshore Safety Induction & Emergency Training (BOSIET) to acquire the essential skills and knowledge for working safely in offshore environments. Don't miss this opportunity to prioritize safety and emergency preparedness.

## About Us

**Elite Offshore Pvt Ltd**, established in 2015, is a leading provider of Offshore, Marine and Industrial Safety and Skill training and certification programs. With a commitment to safety, compliance, and excellence, we empower professionals worldwide with the knowledge and skills they need for success in their careers.

**Ecademy** was established in 2021, serves as our specialized division, providing customized E-Learning solutions designed to meet the specific needs of the industry. Through Ecademy, we offer the IADC-Accredited RigPass Online Course, alongside other valuable E-Learning programs like IMDG Code Courses, Basic First Aid, Cyber Security and many more.
