

Rigger Competence Stage 4 Fact Sheet

Course Overview

The Rigger Competence Stage 4 course is designed to provide advanced training in complex rigging operations, lifting plans, and risk management. It focuses on developing expertise in critical lift supervision, advanced load calculations, and compliance with industry regulatory standards. The course aims to elevate riggers' competencies in overseeing intricate lifting tasks and ensuring safety and efficiency.

client site training, depending on your personal preferences

learn from an expert trainer with years of experience

Budget Friendly learning

Who should enroll to this course?

Individuals who have successfully completed Rigger Competence Stage 3 or possess equivalent experience and knowledge in rigging operations are eligible to enroll in the Rigger Competence Stage 4 course.

This includes experienced rigging professionals, supervisors, safety personnel, and individuals involved in managing and overseeing complex lifting activities.

What does this course Covers?

I. Plan and prepare for lifting and moving of loads;

Performance Criteria:

- Identify potential hazards associated with the lifting operation
- Implement control measures to address the identified hazards
- Plan the route for lifting and moving the load to minimise any risk to personnel and surroundings
- Ensure the load is accurately assessed for approximate weight, incorporating an adequate safety factor
- Communicate, discuss and ensure understanding of the prepared lifting plan and risk assessment with the lifting team
- Communicate, discuss and agree with appropriate personnel, actions to take related to the lifting operation in the event of an emgcy
- Inform the relevant personnel of the lifting operation and identify any potential disruption to operations
- Obtain the resources identified in the lifting plan required to move the load, following relevant rigging loft procedures
- Ensure the lifting equipment and lifting accessories are free of obvious defects, and certification is current.
- Carry out pre-use inspection of lifting equipment and lifting accessories
- Prepare the load according to specified requirements of the lifting plan

- Course Code - 250
- Duration - 1 Day
- Knowledge level - Advanced
- Category - Offshore Oil & Gas
- Offline/ Client Site

- Protect the load from possible damage during the lifting operation
- Attach the lifting accessories to the load using industry best practice
- Determine the center of gravity of a load that has an offset center of gravity
- Install and position the lifting equipment for balanced weight distribution
- Ensure appropriate barriers are installed at appropriate areas.

Ready to get started?

If you're ready to take your rigging skills to the next level and become proficient in supervising complex lifting operations, enroll in the Rigger Competence Stage 4 course today. Expand your expertise, enhance safety compliance, and advance your career in the rigging industry.
